TO WHOM IT MAY CONCERN:

Re: KCL Contracting & Engineering Ltd..

In the past five years, we have had the opportunity of working with KCL Contracting & Engineering Ltd in three construction projects of different nature and size. The first was a single family custom home, built in Woodbridge. The second, a medium size one storey commercial plaza, the third, a large banquet hall facility, both located in the City of Vaughan.

In all these projects, the firm has provided construction management services, including site supervision, from inception to completion. We have found this firm to be competent, reliable and open to cooperation with our office and our consultants.

We were generally pleased with the quality and efficiency of the work done by this firm on these projects and have no hesitation in recommending them.

Yours very truly,

NINO RICO INC. ARCHITECT
